**Center for HAZMAT  
Rescue & Safety  
Regulatory Resource Center**

**Department of Homeland Security (DHS) Chemical Facility Anti-Terrorism Standards (CFATS)**

This program is administered by the Infrastructure Security Compliance Division (ISCD). The ISCD program assesses **high-risk** chemical facilities, promotes collaborative security planning, and ensures that covered facilities meet risk based performance standards.

Chemicals of Interest (COI) are based on:

- Chemicals covered under the USEPA Risk Management Program
- Chemicals included in the Chemical Weapons Convention
- Hazardous materials that are poisonous by inhalation
- Explosives regulated by the USDOT

Do you fall under this standard? Listed below are resources to help:

- ISCD Webpage: [www.dhs.gov/chemicalsecurity](http://www.dhs.gov/chemicalsecurity)
- CFATS Help Line, 866-323-2957 Monday-Friday 7 am to 7 pm Eastern Time
- Federal Register Department of Homeland Security; 6 CFR Part 27 (Nov 20,2007)

**OSHA Updates** (OSHA Webpage: [www.osha.gov](http://www.osha.gov))

**OSHA Severe Violator Enforcement Program Directive (SVEP)** took effect on June 18, 2010. OSHA's SVEP focuses on enforcement efforts on employers who willfully and repeatedly endanger workers by exposing them to serious hazards. This new directive replaces OSHA's Enhanced Enforcement Program (EEP). Changes from EEP include:

- High-emphasis hazards are targeted, which include fall hazards and specific hazards identified from national emphasis programs.
- Follow up mandatory inspections, enhanced settlement provisions and federal court enforcement.
- Creates a nation-wide referral procedure for regions and state plans.

**National Fire Protection Association**  
The authority on fire, electrical, and building safety

### **Permit Required Confined Space Rescue** (29 CFR 1910.146)

Question: When was the last time you; “evaluated a rescuer’s ability to respond to a rescue summons in a timely manner, considering the hazards involved”? That is a direct quote from 29 CFR 1910.146(k) Rescue and emergency services. Tight budgets have also impacted your municipal Fire Departments. Many of them are dropping certain types of rescue operations that include Confined Space rescue. The affected departments are relying on “mutual aid” or a county technical rescue team (TRT). If you have Permit Required Confined Spaces:

- Contact your local Fire Department and formally assess their ability to perform the type of confined space rescue you need.
- Use OSHA 29 CFR 1910.146 Appendix F- Rescue Team or Rescue Service evaluation criterion (non-mandatory) as a good starting point.
- Obtain a copies of NFPA 1006 (Technical Rescue Professional Qualifications-2008 edition) and NFPA 1670 (Operations and Training for Technical Search and Rescue Incidents-2009 edition).
- **Note:** Fire Departments in Ohio base their technical rescue training, operational protocols and capabilities on NFPA (National Fire Protection Association) standards **not OSHA regulations.**

NFPA website: <http://www.nfpa.org>

Cincinnati State Center for HAZMAT, Rescue & Safety is an all service provider in technical advice on a full range of OSHA, EPA, USDOT and DHS regulations that impact your organization’s operations. If you have questions, please contact WDC HRS Business Manager: [brian.canteel@cincinnatiastate.edu](mailto:brian.canteel@cincinnatiastate.edu). Office: (513) 569-4682.
